# CONSIDERABLE TRAFFIC DISRUPTION

## A28 HATTEMERBROEK AND ZWOLLE ZUID (IN BOTH DIRECTIONS)

8 MARCH UNTIL THE END OF APRIL 2011

The Directorate-General for Public Works and Water Management will continue the work on the bridge over the IJssel near Zwolle between the Hattemberbroek junction and the Zwolle Zuid - Spolderplein (nr. 18) exit in both directions. This work is being completed as a component of widening the A28 motorway between Zwolle and Meppel.

Traffic in both directions on the A28 between the Hattemberbroek junction and Zwolle Zuid, as well as traffic intending on using the Zwolle Zuid - Spolderplein (nr.18) exit will encounter considerable traffic disruption. The expectation is that during rush hour the extra travel time will be between 10 and 30 minutes.

During the day there will be three narrowed and shifted traffic lanes available for traffic in both directions during the work on the bridge over the IJssel. A reduced maximum speed will be in force. Allow for longer travel time.

### Suggested routes in both directions

- The N50 towards Emmeloord, A6 towards Joure/Heerenveen
- The A28, N302 exit 13 Harderwijk, towards Lelystad, A6 towards Joure/Heerenveen
- The A7 Groningen towards the Joure junction, the A6 towards Almere, the Almere A27 junction towards Utrecht
- The A28 junction Hoogeveen N48, towards N34 Ommen, N36 Almelo, A1 Hengelo
- The A1 towards the A31 (Germany): freight traffic with the destination of Northern Germany
